

ui::Widget

```
classDiagram
    class uiWidget["ui::Widget"]
    class uiButtonConfig["ui::ButtonConfig"]
    class uiDropDownConfig["ui::DropDownConfig"]
    uiButtonConfig --|> uiWidget
    uiDropDownConfig --|> uiWidget
```

A UML class diagram illustrating inheritance. At the top is a box labeled 'ui::Widget'. Below it are two boxes: 'ui::ButtonConfig' on the left and 'ui::DropDownConfig' on the right. A horizontal line connects the two bottom boxes, with a vertical line extending upwards from the center of this line to the bottom of the 'ui::Widget' box, ending in an arrowhead. This indicates that both 'ui::ButtonConfig' and 'ui::DropDownConfig' inherit from 'ui::Widget'.

ui::ButtonConfig

ui::DropDownConfig
